

Mathematics for adults

Mathematics

Mathematics is not only a key requirement for many different types of educations, but it is also of great importance in the work field and everyday life. For some people it has been a while since they studied mathematics, or they only remember part of what they learnt. This can lead to insecurities or keep people from pursuing certain career paths. In this course participants will work in small groups to brush up on their mathematical skills, close knowledge gaps and learn the most crucial contents and operations of basic mathematics.

Course topics	<ul style="list-style-type: none"> • Written basic operations • Fractions • Measurements (length, mass/weight, time, money, surface, capacity) • Proportion (rule of three) • Simple equations
Course duration	Upon agreement, min. 12 weeks recommended
Course begin	Regular starting dates
Course times	2 lessons of 45 mins per week From 3pm to 4.30pm or from 6pm to 7.30pm
Requirements	none
Group size	Min. 6 participants
Course price	CHF 85 per week, materials included
Additional information	Participants will be put into different groups based on their skills evaluated in an assessment test
